Our institution conducts regular quality audits on environmental and energy initiatives to ensure sustainability and adherence to best practices. Below is a detailed overview of our efforts in this regard:

1. Green Audit / Environment Audit: The institution routinely undertakes a comprehensive Green Audit to assess our environmental performance. This audit evaluates various parameters, including waste management, resource utilization, and biodiversity conservation. The findings from these audits have guided us in implementing effective strategies to enhance our environmental impact.

2. Energy Audit: An Energy Audit is conducted to monitor and optimize our energy consumption. This audit involves the analysis of energy usage patterns, identification of areas for improvement, and the implementation of energy-saving measures. Our institution has consistently acted upon audit recommendations to achieve greater energy efficiency and reduce our carbon footprint.

3. Clean and Green Campus Initiatives: Our commitment to maintaining a clean and green campus is evidenced by ongoing initiatives through NSS such as regular tree planting drives, waste reduction programs, and the maintenance of eco-friendly infrastructure. The institution actively engages students and staff in these initiatives, fostering a culture of environmental responsibility.

4. Beyond the Campus Environmental Promotion Activities: In addition to on-campus efforts, our institution actively participates in and promotes environmental conservation activities beyond our campus. This includes community outreach programs, participation in regional environmental campaigns, and collaborations with local environmental organizations. These activities extend our impact and demonstrate our dedication to broader environmental stewardship.

These audits and initiatives reflect our institution's unwavering commitment to maintaining a sustainable and environmentally responsible campus. We will continue to uphold these standards and enhance our practices in line with the evolving needs of our environment.
