

2021-2022

BEST PRACTICE: 1

- 1. Title of the Practice:** Publication of e-Journal
- 2. Goal:** The goal is to reach researchers and scholars globally, fostering a multidisciplinary approach to research.
- 3. The Context:** In today's academic world, a multidisciplinary approach is crucial for addressing research challenges effectively.
- 4. The Practice:** The institution publishes the e-journal POSTSCRIPTUM (ISSN 2456-7507) online, indexed in DOAJ and approved by UGC till 2018-19. It is a scholarly peer-reviewed interdisciplinary journal that publishes high-quality papers from scholars and researchers worldwide. During the COVID crisis, the journal continued its online publication, maintaining its status as an open-access platform.
- 5. Evidence of Success:** The e-journal has attracted submissions from scholars and researchers across the state, country, and international institutions, indicating its success in reaching a diverse audience and fostering academic exchange.
- 6. Problems Encountered and Resource Required:** Potential challenges may include managing the publication process efficiently, ensuring the quality of submissions, and allocating resources such as editorial support and technical infrastructure for online publishing.

BEST PRACTICE: 2

1. Title of the Practice: Multidisciplinary Talks Programme (MTP)

2. Goal: The goal is to promote a multidisciplinary approach in academia by organizing a series of lectures under the Multidisciplinary Talks Programme (MTP), allowing faculty members to share insights from their research areas.

3. The Context: In today's global academic landscape, a multidisciplinary approach is essential for addressing complex research problems effectively.

4. The Practice: The teachers' council initiated the MTP, where faculty members deliver lectures using PPTs and traditional methods, focusing on their respective research areas.

5. Evidence of Success: The MTP has been highly instructive and popular among faculty members, providing them with opportunities to refresh their research areas with a multidisciplinary perspective.

6. Problems Encountered and Resource Required: Challenges may include ensuring active participation, managing logistics for the talks, and providing necessary resources such as technical support and scheduling coordination for the programme's success.
